The First Consumer Digital Video Recorder

Record straight from your camcorder and other recordings easily and effortlessly

Backup your treasured tapes, vinyl, MDs and others onto durable CDs

Your memories on CD can be played again and again without the risk of deteriorating

Playback on compatible CD and DVD players, and multimedia computers

Family memories were meant to last forever. If you have older recordings stored on video tapes, audio tapes or even vinyl records, transfer them to CD easily and they can last a lifetime. The Terapin CD Video Recorder will amaze you with its ease-of-use and with the affordability of blank CDRs and CDRWs, it's time to make your memories last forever.

TX-0002

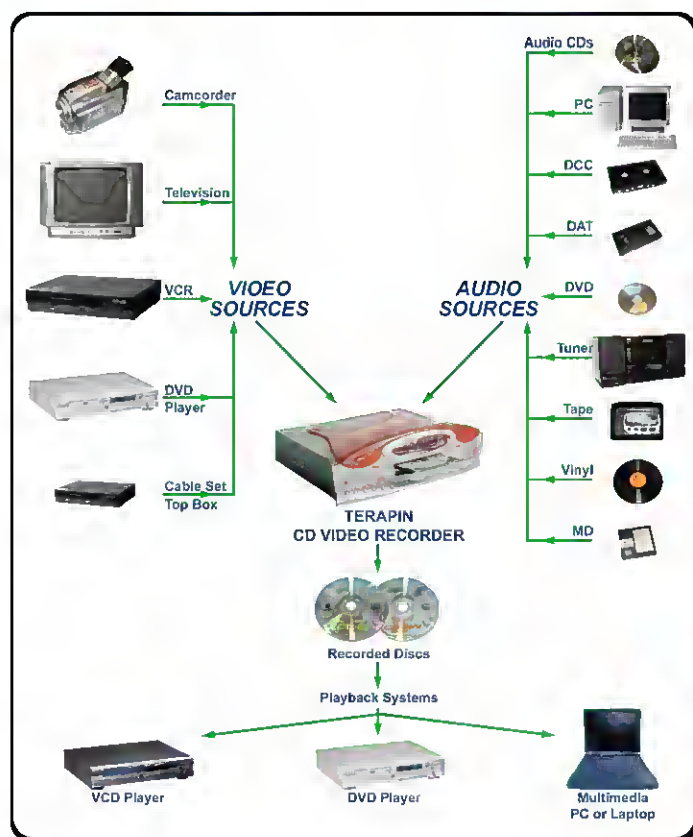

Make Your Memories Last Forever...

Memories are meant to last forever, not to turn moldy after a few years.

The Terapin CD Video Recorder is as easy to use as a VCR. All you need to do is to put in a blank CDR or CDRW and you can record straight from your camcorder or transfer old recordings from video tapes, old audio tapes and vinyl records to CDs. Play the CDs on CDR/CDRW-compatible VCD and DVD players, all multimedia computers, and of course, the Terapin CD Video Recorder.

Unlike tapes, CDs require minimal maintenance and don't get jammed. Your memories on CD can be played again and again without the risk of deteriorating. Don't wait till your tapes turn moldy, now that you have a way to make your memories last forever.
